Additional Services

First Look

This is a moment set up before the wedding where the bride and groom see each other in their wedding attire for the first time and embrace the emotion. He stands there while his bride approaches him from behind, taps his shoulder and then he turns to hug her. Ask us how we can capture this special moment.

Highlight Reel

The best moments of your wedding day are showcased with music. Let us know if you're interested in this type of video. Additional time may be required to complete.

Private Vows

This is a private moment before the ceremony where the couple gives personal promises and declarations to each other and express their love in a more intimate way.

How We Met: Love Story

With this option we ask to have a day set aside before the wedding date to capture interviews with the bride and groom separately so they can each tell their side of the story of how they met the other. We also capture footage of the couple enjoying being together and edit everything to music.
